

Media channel

The media channel enables a flexible, safe and tidy media supply at your workstation. It can be equipped with individually configurable components such as sockets, switches and network and compressed air connections. Thanks to its simple integration and installation, it is ideal for retrofitting existing workstations. Its high flexibility and

modularity allow it to be customised precisely to your requirements. At the same time, the structured and clearly organised cable routing ensures order and safety.

We are happy to address the specific needs of your application and offer you a tailor-made solution that integrates precisely into your working environment and meets the highest standards of functionality, organisation and safety.

Compressed air

With our compressed air accessories, you can ensure a safe, efficient and clean media supply in your working environment. Our robust, easy-to-maintain and easy-to-maintain hose reel to be integrated, Couplings, connections and distributors are ideal for flexible use in industry, workshops and assembly. The components are ideal for flexible use in industry, workshops and assembly. They ensure greater organisation, safety and efficiency in the workplace.
