

## Roller track adapter type L80-90

### Application

This roller track adapter can be screwed onto the 30/40/45/50 series base extrusions. The roller tracks are pushed in and attached to an extrusion structure.

Replacing or moving them is simple.

## Roller holder

### Application

The roller holder can be attached to our 8 nut with only one screw and one nut securely fastened and a sliding block. It accepts axles with a diameter of Ø8 and Ø10mm. Thanks to its symmetrical design, the holder can be used on both sides. This means that roller tracks can be easily realised.

### Material

Standard: PA6 G15 black  
ESD version: PA66 CF15 black

### Version

Plastic roller holder
